

TAMOL PLUS

Paracetamol BP 500 mg
+ Caffeine BP 65 mg

Tablet

DESCRIPTION

TAMOL PLUS is a combination of Paracetamol and Caffeine. Paracetamol has analgesic and antipyretic properties with weak anti-inflammatory activity. Caffeine is an alkaloid which is a theophylline-like xanthine derivative. By intermolecular association with Paracetamol, Caffeine increases the solubility and transmembrane permeation of Paracetamol. In addition, Caffeine increases the pain threshold level. Caffeine has also an intrinsic power to raise vessel tone in the brain, which provides another benefit to treat migraine and headache.

COMPOSITION

TAMOL PLUS : Each tablet contains Paracetamol BP 500 mg and Caffeine BP 65 mg.
